CONSCIOUS CHOICE FOR OURSELVES AND THE PLANET

CORK – a warm material with a natural texture and look. After harvesting, cork trees remain alive and can regenerate their bark. Also, waste from cork production is used to produce further items or for upcycling.

BAMBOO – a durable material with a natural look and feel. It's one of the fastest-growing plants on Earth. Grows back after being cut down and is a persistent plant that requires little chemical protection.

WOOD – an easily accessible local material, which reduces the carbon footprint. Best if harvested responsibly, from legal sources, and combined with reforestation.

STAINLESS STEEL – one of the most recycled materials. Steel recycling is effective and allows for repeated processing without losing the properties of the material. Safe for food storage and resistant to corrosion.

GLASS – frequently recycled material. Glass recycling is efficient and allows multiple processing cycles without losing the properties of the material. It doesn't release harmful substances and is safe for food storage.

RPET – made from PET plastic bottles, which reduce waste and the need for petrochemical materials. RPET production usually requires less energy than that of PET. Retains the basic plastic features of durability and flexibility.

COTTON – a natural, multifunctional material. It is biodegradable, which minimises waste. Depending on the type, it can be grown with minimal use of chemicals (e.g. organic cotton).

JUTE – a natural fibre extracted from the jute plant, which grows relatively fast and does not require much chemical treatment. Compared to other crops, it has a lower water demand. It decomposes naturally and is durable.

RECYCLED PAPER – it reduces the need to cut down trees and the production requires less water compared to regular paper. It can be recycled again, which promotes a closed material cycle.

THE IMPORTANCE OF SUSTAINABILITY

Caring for the environment is a collective responsibility that involves both companies and consumers. By choosing environmentally-friendly products and adopting sustainable practices, consumers play an important role in protecting our planet. Our company is committed to supporting these efforts by using environmentally-friendly materials, optimising packaging, and using energy from renewable sources in our processes. Furthermore, we aim to implement sustainable methods along the whole supply chain. Together, we create a synergy that promotes responsible consumption.

Our commitment to sustainability has been recognised in a ranking that evaluates companies on their sustainability efforts. This recognition highlights our ongoing commitment to practices that do our responsibilities justice and contribute to the long-term success of our operations.

SUSTAINABILITY MEETS QUALITY

We believe that high-quality products and sustainability can go hand in hand. Many of our products are made from renewable, recyclable, and environmentally-friendly materials, providing responsible alternatives without compromising functionality or design. Each item is carefully crafted to support sustainable choices.

JOIN US IN FORMING A GREENER FUTURE

Transparency and continuous improvement are at the heart of our sustainability journey. We work towards sustainability in every aspect of our business.

PACKAGING DESIGN - FIRST IMPRESSIONS MATTER

We promote sustainability with our standard packaging made of kraft paper. Using environmentally-friendly materials, we protect our 2.500 products while making a contribution to a greener planet. Together, we can create a world where economics and ecology thrive side by side.

UNIFORM CONCEPT

Our kraft paper packaging is eco-friendly and offers superior durability thanks to its robust, long-lasting material properties. Each product arrives in a clean, streamlined design that highlights essential information such as the product name and colour. Unique selling points are displayed on the back in German and English, supported by intuitive icons that provide immediate insight into the contents.

THOUGHT-OUT UNBOXING

Though not traditional gift wrap, the packaging is attractively designed and ready to be gifted as is. This thought-out design not only captures customer interest but also enhances the unboxing experience, creating memorable moments that elevate your brand's profile.

EYE-CATCHER

With an eye-catching 3D sketch on the front, our packaging attracts attention on store shelves. The stable, stackable boxes ensure that even large quantities can be transported with ease.

RECYCLING AND SUSTAINABILITY

Made with recycled fibres, our packaging minimises paint usage and contains no varnish layers, making it highly recyclable. Once used, the materials can be easily processed for reuse, contributing to a sustainable cycle.

DIGITAL TRANSFER

This is an advanced technique that delivers high-quality, full-colour designs with exceptional detail and flexibility. It involves printing a digital image onto special transfer foil, which is then heat-pressed onto the fabric. Applying this technique, we exclusively use the CMYK colour palette to achieve the best effect. The result is a soft, photographic-quality print that is vibrant and durable.

CHARACTERISTICS:

- photographic print quality and perfect colour reproduction (CMYK)
- precise shapes with minimum line thickness (0,5 mm)
